

# Arktite circuit breaking CPS receptacles and CPP plugs

Delayed action  
Factory sealed

Cl. I, Div. 1 & 2, Groups C, D  
Explosionproof  
Wet Locations

2P

## Applications:

Arktite® CPS receptacles, angle and straight types, and CPP plugs are used:

- With portable electrically operated devices such as motor generator sets, compressors, conveyors, portable tools, lighting systems and similar equipment
- In locations which are hazardous due to the presence of flammable vapors or gases
- In damp or corrosive locations
- In petroleum refineries, chemical and petrochemical plants and other process industry facilities where similar hazards exist

Figure 1

Figure 2

Figure 3

## Features:

- The delayed action feature permits the plug to be used as an emergency push-pull switch
- CPS receptacles are equipped with a rotating mechanism which prevents complete withdrawal of the CPP plug in one continuous movement; details of operation are illustrated and explained below:

**Figure 1** shows a CPS angle type receptacle assembly with CPP plug fully engaged.

**Figure 2** shows the plug withdrawn until it is stopped by the delayed action mechanism. In this position, the circuit has been broken and the arc has been snuffed in the contact chambers. To completely withdraw the plug as shown in **Figure 3**, the delayed action release lever must be rotated counterclockwise. The time required to actuate the mechanism permits dissipation of the arc-generated heat before contacts and arcing chambers are opened to the atmosphere. When inserting the plug, the reverse procedure is followed.

- CPS receptacles are factory sealed to simplify installation and wiring – external seals are not required
- Series 152 receptacles have top hinged cover design, with 45° downward angled receptacle housing, to provide superior environmental protection from accumulations of dust, snow, ice and water
- Back boxes used for angle type receptacles are standard EDS bodies; assemblies are listed with single- and two-gang bodies and dead end or through feed hubs – 1/2" to 1" sizes
- Back boxes used for straight type receptacles are available with a variety of hub arrangements in 1/2" and 3/4" sizes
- All receptacles and 30 ampere plugs are provided with pressure terminals for ease of field wiring; 20 ampere plugs have solder terminals and pressure terminals options

## Certifications and compliances:

### NEC/CEC:

- Class I, Divisions 1 & 2, Groups C, D

### UL standard:

- UL1203

### CSA standard:

- C22.2 No. 30<sup>A</sup>

## Standard materials:

- Receptacle housings – die cast copper-free aluminum
- EDS back boxes – Feraloy iron alloy (U.S.); copper-free aluminum (Canada)
- Other back boxes – Feraloy iron alloy
- Plug exteriors – copper-free aluminum or Krydon fiberglass-reinforced polyester (see listings)
- Insulation (all receptacles and plugs) – Krydon fiberglass-reinforced polyester
- Pressure or solder contacts – brass
- Crimp/solder contacts – leaded red brass

## Standard finishes:

- Copper-free aluminum – aluminum acrylic paint
- Feraloy – electrogalvanized and aluminum lacquer
- Fiberglass-reinforced polyester – natural (red, white)
- Brass – natural
- Leaded red brass – electro-tin-plate

## Electrical ratings:

- Angle type – 20 and 30 amperes; 125 and 250 VAC
- Straight type – 20 amperes; 125 and 250 VAC

## Grounding:

- NEC Article 501 and CEC Part 1, Section 18 requires that metal frames or exposed non-current-carrying metal parts of portable devices used in hazardous locations be grounded through an extra conductor in the portable cord
- CPS receptacles and CPP plugs are provided with an extra grounding pole
- In plugs, provision is made for attachment of the grounding wire to the grounding pole; in addition, direct connection is provided between plug and receptacle housings and the grounding pole; in the receptacle, grounding is accomplished through the conduit system

## Interchangeability of plugs with non-hazardous location receptacles:

- 30 ampere CPP plugs can also be used with standard 30 ampere Arktite AR receptacles of the same style and number of poles, thus permitting portable devices suitable for use in hazardous locations to be connected to receptacles in both hazardous and non-hazardous areas

**Note:** Equipment to be used in hazardous areas must be suitable for use in the specific hazardous location.

<sup>A</sup>No CSA certification on CPP516M plug.

<sup>D</sup> CSA certified units are rated at 600 VAC at 7A. CPP516M is not CSA certified.

<sup>C</sup> Back boxes are available in copper-free aluminum. To order, add suffix 'SA' to end of catalog number.

<sup>D</sup> Receptacles will take any of the plugs grouped in the bracket opposite the receptacle listings.

<sup>E</sup> 20A plugs are furnished with solder terminations at standard; ground contacts have pressure terminations.

<sup>F</sup> CPP516M 20A plug is furnished with pressure terminations at standard.

## Options:

- | Description   | Suffix         |
|---|----------------|
| • Material – copper-free aluminum, natural finish.....  | <b>SA</b>      |
| <i>Available on certain back boxes (see listings)</i>   |                |
| • Special polarity.....   | <b>S4</b>      |
| <i>Receptacle interior rotated 22½° to right (viewed from face) and plug changed to match</i>   |                |
| <i>Available on 30A units only</i>  |                |
| • Combination of receptacles and EFS/EFD or EDS devices, such as pilot lights, switches, pushbutton stations, etc., can be furnished using three-, four- and five-gang bodies.... | <b>Specify</b> |
| • Hub arrangements other than those listed can be supplied .....  | <b>Specify</b> |

## Dimensions (in inches):

### Angle type receptacles

Series 152

Series 532 and 732

a = 3 1/2 for single-gang  
7 3/16 for two-gang

### Straight type receptacles

### 20A plugs

Cat. #	a①	b①	c	d
CPP516M②	8 3/8	6 7/8	1 3/4	1 3/4
CPP516①	8 3/8	6 7/8	1 3/4	1 3/4
CPP512①	7 19/32	6 5/32	1 3/4	1 3/4

### 30A plugs

① CPP516M 20A plug is furnished with pressure terminations at standard.  
② 20A plugs are furnished with solder terminations at standard; ground contacts have pressure terminations.  
③ These dimensions are approximate and vary with cable size.

2P

# Arktite circuit breaking CPR cable connector receptacles

2P

Delayed action

## Applications:

Arktite® CPR delayed action cable connector receptacles are used in **non-hazardous areas only**<sup>A</sup>:

- To make up adapter sets for connecting portable devices having CPP plugs to receptacles in non-hazardous areas; this is accomplished by equipping one end of the length of cable with the CPR receptacle and the other with a plug to mate with the receptacle in the non-hazardous area
- To make up extension cords using the CPR receptacle at one end and a CPP plug at the other

## Features:

- Spring door housing with the same delayed action rotating mechanism provided in CPS receptacles
- Pressure terminals are furnished for ease of wiring
- Gland nut with mechanical cable grip and bushing for effective strain relief

## Standard materials:

- Housing – copper-free aluminum
- Insulation – fiberglass-reinforced polyester
- Contacts – brass

## Standard finishes:

- Copper-free aluminum – natural
- Fiberglass-reinforced polyester – natural (red)
- Brass – natural

## Ordering information – Style 2, grounded through extra pole and shell:
