Save space in the switchboard with EBC000*

EBC000 -S (EBC000) width dimensions is equal to half the width of EBH00 -S (EBH00), so we can install more disconnectors (keeping a certain width of the switchboard) to protect individual circuits in the switchboard.

Fuse switch disconnectors EBC000 are designed for installation of distribution board's protective panels at two depths: covering system at 70 mm depth: covering system at 32 mm and 70 mm depth

Covering system at 32 mm depth

Covering system at 70 mm depth

Fuse switch disconnectors EBC000 are manufactured in two versions depending on type of cable terminal

- With bottom cable terminal
- With top cable terminal
